Leak detection kit - 253519

Easy-to-use leak detection kit. The complete leak detection kit includes fluorescent leak detection dye and a compact, efficient high powered LED detection lamp. The compact light can fit in hard-to-reach areas, making finding leaks even easier.

The kit is perfect for preventative maintenance, system diagnosis - and for finding small “pinhole” Freon leaks. Detect all air conditioning and refrigeration leaks with the best tools available.

See tutorial video:

- Premium U/V Leak Detection Kit w/ 4 pieces.
- Powerfull LED detection lamp.
- Anodized aluminum, rugged construction.
- Nylon wrist lanyard.
- Uses 3) AAA batteries.
- UV dye 237ml (treats 32 vehicles).
- UV FLUORESCENCE enhancing glasses.
- Hand turn dye oil injector for R134a & R12 systems.

Leak detector - 253844

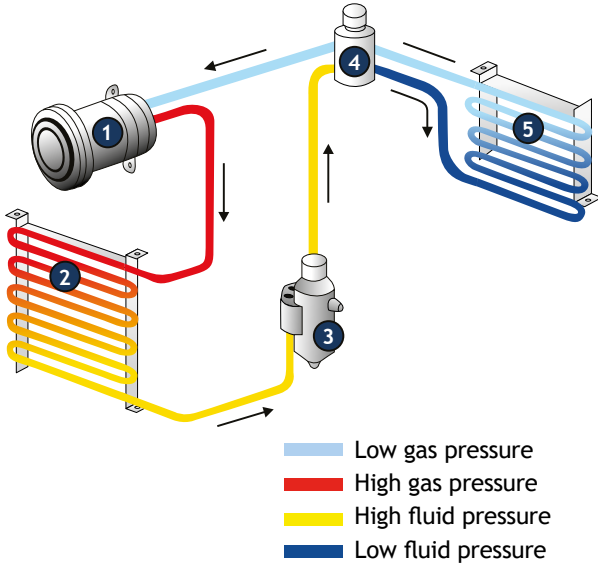

Long life solid electrolyte sensor technology. Designed to detect the more current and difficult HFC refrigerants such as R-134a in addition to the new HFO-1234yf and all HCFC (R-22) and CFC (R-12) refrigerants including SNAP approved hydrocarbon blends.

Unique digital leak size indicator takes the guesswork out of whether or not to repair a small leak. The digital display is independent from the audio alarm and sensitivity level, allowing the precise pinpointing of the leak source.

See tutorial video:

- Detects all CFC, HFC, HCFC refrigerant and blends.
- Meets SAE J2911, SAE J2913 SAE J1627, SAE J2791 and the European standard EN 14624.
- Detects R134a and 1234yf leaks as small as 0.05 oz. per year.
- Compact & flexible heated sensor technology.
- Sensitivity level adjustable.
- Includes digital leak size indicator, audio leak alarm and low battery indicator.
- Very effective for finding small leaks.
- Includes heavy duty plastic storage case.

The 5 most important parts for air conditioning:

- 1 Air conditioning compressor
- 2 Condensor
- 3 Filter drier
- 4 Expansion valve
- 5 Evaporator

Benefits of HC-CARGO Testing Tools

- Easy to apply and use
- Fast and accurate testing
- The tools can be used for testing after end repair to ensure the system is performing optimally
- Quality! Tested to comply with specification in the automotive market
- Saves time, saves money, provides happy customers
